

WELCOME TO THE EDUCATIONAL COURSE

«MS & FAMILY PLANNING»

An interdisciplinary discussion involving pharmacology,
neurology and gynecology

Tuesday, October 24, 2023
Sitem-Insel – Freiburgstrasse 3 – 3010 Bern

• **HYBRID EVENT (IN PERSON & VIRTUAL)** •

Dear colleagues

Multiple sclerosis is the most common disease in young adulthood that leads to neurological disability. With a high female preponderance (approx. f:m 3:1) it often affects young persons in childbearing age. Although chronic and not curable, a large number of disease modifying immunotherapies are available. These aspects highlight the special considerations in the care of persons with MS (pwMS) when it comes to family planning, conception, pregnancy, birth and lactation period. They also highlight the need for close interprofessional and interdisciplinary cooperation. During this meeting we would like to highlight different neurological, pharmacological and gynecological aspects. More importantly we aim at fostering the exchange between our different groups that all play an important role in the care for pwMS.

We are looking forward to meeting you in Bern for this meeting in a novel format.

Kind regards

Andrew Chan

Head Medical Division Neuro
Inselspital Bern, Bern University

Prof. Dr. med. Daniel Surbek

Acting Chairman, Department
of Obstetrics and Gynecology,
Head, Fetomaternal Medicine,
Inselspital Bern

Prof. Dr. med. François Girardin

Head Division of clinical Pharmacology
Lausanne University Hospital CHUV,
Lausanne
